NEWSFLASH

- Wilderness listed among the [Top 10 Safari Outfitters](#) in *Travel + Leisure's* World's Best Awards 2023 – as voted by the magazine's readers!
- Drones: Please note that it is illegal to fly any aerial UAVs/drones or operate terrestrial UAVs/beetle-cams in all of our Wilderness concessions in all areas of operation, unless a permit is obtained from the relevant Government authority.
- We are thrilled to celebrate a decade of Wilderness24 – a pioneering risk and incident-management system that has set the standard across Africa's safari industry. A one-of-a-kind in our industry, Wilderness24 offers a sophisticated, robust and tailored approach to proactive safety, as well as incident response across all of our regions.

GENERAL REMINDER

Wi-Fi in our Camps

We firmly believe disconnecting to reconnect is one of the greatest benefits for guests spending time in our remote, beautiful areas. However, Wi-Fi is available in our guest suites for use at their leisure. It is important to note though, that as our internet connection relies on satellites rather than fibre, speed and reliability might not be quite what they are used to. It is best suited to messaging, low data emails, and WhatsApp voice calls (i.e. it is not suitable for downloading movies and high data items). There is no Wi-Fi in the main communal areas out of respect for those guests who prefer to remain disconnected. If you have guests travelling over the next few months who have important work and need a good connection, please do let your Travel Designer know to inform our Operations team.
