Hwange National Park

Photos taken by our guides Peter Gava and Causemore Dzvene

Elevated on tree branches or termite mounds, these cheetahs gain the perfect vantage point — using the height to spot prey, watch for rivals, and survey their territory across the open plains.

Lion cubs are playful,
developing essential skills for
hunting and socializing within
the pride.

Photographed by guide Simba Gomba

A pack of wild dogs on the move — these highly social and endangered predators rely on coordinated hunting strategies and strong pack bonds, resulting in one of the highest success rates among African predators.

Dramatic sunset scenes in
Hwange as the plains come
alive after summer rain.

Photos shared by guide Eustace Matavire

Lion prides in Hwange National Park are powerful and adaptable, navigating a dynamic landscape of open plains and dense bush.

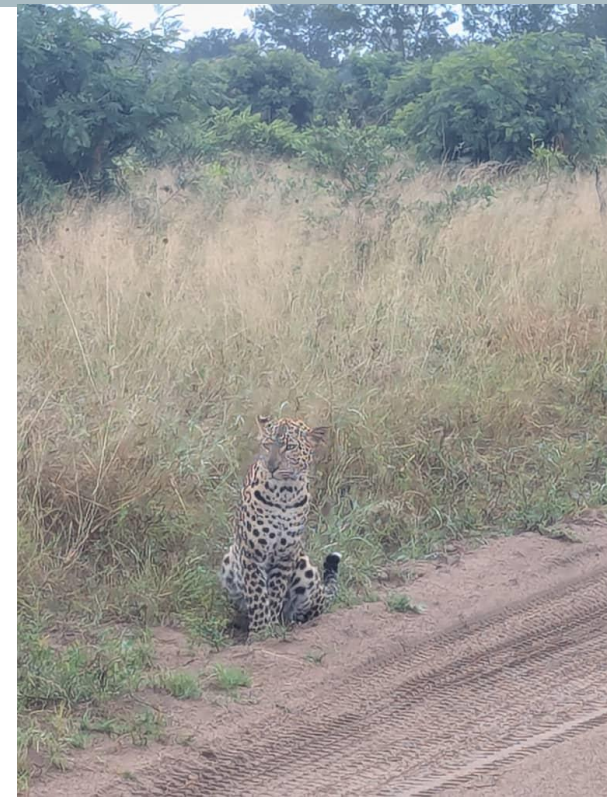

Photos shared by guide Eustace Matavire

Lion cubs play and explore under the watchful eyes of the pride. These early lessons in stalking, climbing, and social bonding are vital for their survival in this predator-rich ecosystem.

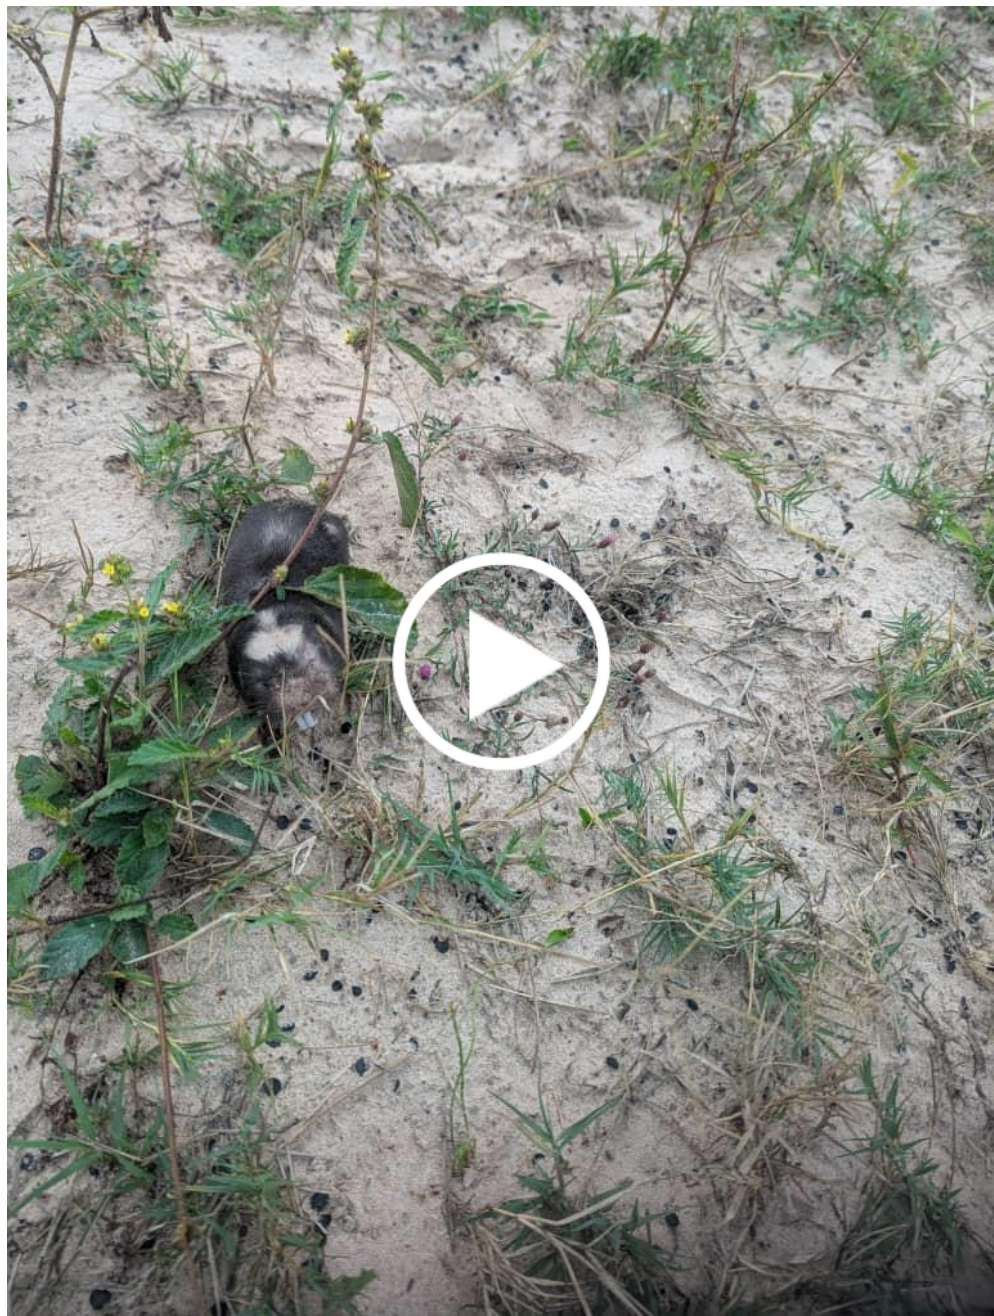

Videos shared by guide Eustace Matavire

A mother lioness nurses, protects, and relocates her cubs to safer spots while teaching them the ways of the wild, and a honey badger darts down a sandy track, fearless and fast. Known for their toughness and tenacity, these small carnivores cover large distances in search of food, undeterred even by larger predators or passing vehicles.

Shared by our guide Peter Gava

In Hwange, lions rule the open plains while elusive leopards stalk the woodlands — two apex predators, each mastering their own terrain in Zimbabwe's largest National park. Occasionally they meet, and lions have the upper hand.

Video and photos taken by our guide Peter Gava

Rarely seen above ground, the Damara mole rat is a true subterranean specialist — built for life in the dark, with powerful digging claws, ever-growing incisors, and a remarkable ability to navigate underground tunnels.
